

# Action Required:

**Asset ID# AP000749**

**Action:** Annual 3<sup>rd</sup> party inspection due in **44** days.

By law roof anchors and static lines need to be tested and recertified every six to 12 months, depending on your state.

Each anchor and the static line system must be inspected. Chemically set and friction set anchors must be tested to 50% of their load limits. The cable of the static line needs to be load tested every six to 12 months, depending on your state's regulations.
